1. The approved list of material testing laboratory is based on accreditation as per ISO/IEC-17025 from any accredited body having an MRA with International Laboratory Accreditation Cooperation(ILAC)/ International Accreditation Forum(IAF) such as NABL, etc./inspection reports/recommendations of field units.					
2. The field units must ensure before sending material/samples for testing that the laboratory is equipped to carry out required test as per specifications and has valid accreditation certificate from any accredited body as mentioned above on the day of submission of test samples/conducting field tests.					
3. PQC Mix Design should be got done only through labs who have facility of testing flexural strength with beam of size 15 X 15 X 70 cm as per IS: 516. Testing of smaller size of beam or testing of cubes for compressive strength and then arriving at flexural strength is not recommended.					
4. Apart from the approved laboratories, services of Govt. Laboratories, Govt. Engg. Colleges, IITs, NITs, CRRI, National Council for Cement and Building Materials, etc. may be availed, wherever available.					
5. In case any problem is faced by any region/station, the same may be brought to the notice of Deptt. of Structure for further necessary action.
